SUMMARY

Commissioning services for all school buildings as well as a review of the energy procurement (gas and electric) process for all school buildings.

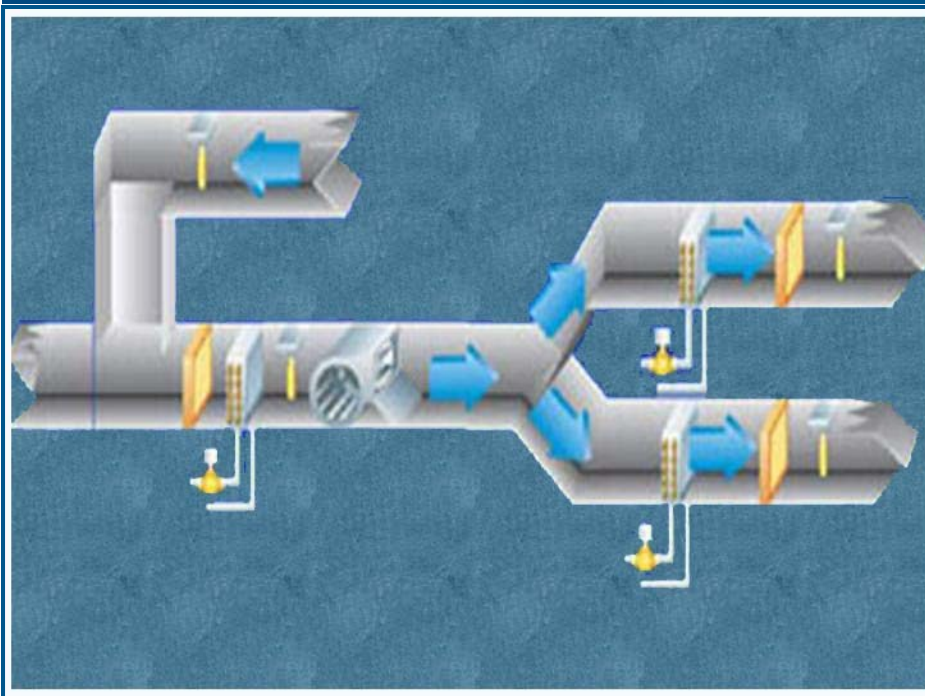

SERVICES

- Energy audit development and analysis
- Energy savings analysis
- Energy Trending
- Energy modeling
- Conservation solutions
- Energy analysis
- Preliminary Assessment for Energy
- Energy efficiency Rhode Island
- Energy savings HVAC
- Energy analysis

MEASURES

- Lighting controls
- EMS
- Boilers
- Variable speed drives

Barrington Schools Commissioning

UNIQUE VALUE TO CUSTOMER

The Barrington Public School Department in conjunction with the Rhode Island State Energy Office (RISEO) is interested in determining if there are any ways to operationally decrease the energy consumption throughout the district. An area that may need further inspection was determined on the operational function of the building energy management systems.

ADI Energy evaluated all of the energy management systems throughout the Barrington Public School District and provided the Barrington Public School Department administration with a procedure to insure all of the Barrington Public School buildings were operating at or below the energy benchmarks developed by ADI Energy.
