SUMMARY

American Development Institute (ADI Energy) was hired by the Department of Energy Resources (DOER), through the DCAM renewable house doctor contract, to perform photovoltaic (PV) feasibility studies on 3 buildings at Salem State College. This is in line with the Massachusetts Leading by Example Program, which upholds Governor Patrick's goal of providing 250MW of solar PV power by 2017.

Solar Energy Massachusetts

Investment: \$1,154,000

of Buildings: 3

BUILDINGS

- Building One
- Sullivan Academic Building
- O'Keefe Athletic Center

SERVICES

- Total cost evaluation
- Savings modeling
- Solar PV layout design
- Preliminary assessment for energy
- Energy consultants
- Energy engineering
- Renewable energy services
- Sustainability
- Solar PV layout design

MEASURES

- Solar PV Evaluation

Department of Energy Resources-MA Solar PV - Salem State College

UNIQUE VALUE TO CUSTOMER

ADI Energy visited the Salem State College campus and developed a solar PV feasibility plan. The plan included surveying the location where the PV systems will be installed. ADI's report summarizes the evaluation of each building at Salem State College and its recommendations for PV system installation.

ADI Energy provided the DOER and Salem State College a report that details the audit, associated analysis and the resulting feasibility of the potential project. ADI Energy provided a conceptual design that maximizes the output of the system while minimizing its investment. ADI Energy also evaluated the varying layout designs for each building at Salem State College in order to maximize the energy output of the system.
